# MAGNAROD

- Magnarod is a must have tool when it comes to cleaning metal swarf or nuts and bolts from work benches or machinery. It is also perfectly suited for collecting tie-wire from 'reo'.
- Powerful Rare Earth magnets sealed in food grade stainless steel will attract metal contaminants to the outer tube below the cleaning collar as product passes the powerful 8000 gauss magnetic bar. To remove the collected swarf or other ferrous particular simply pull the handle and watch the collected material fall off into a bin or collection tray. This self cleaning action further eliminates the risk of injury associated with handling sharp metal fragments.

PART NO.	DESCRIPTION	UNIT PRICE
89099	25mm Diameter, 500mm long (220mm pick-up area under collar)	\$115.00

- All prices excluding GST
